

# Want To Generate Solar Power at No Cost to You?

## Corvallis Community Power Club will Pay to Rent Your Roof!

1<sup>st</sup> Solar Panels on Corvallis High School

**What is Corvallis Community Power Club?** *It's community-supported clean energy.*

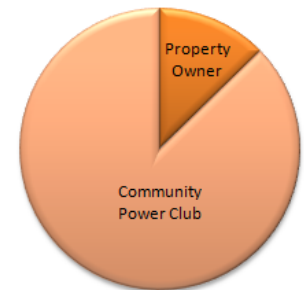

Corvallis wants to increase locally-generated clean energy and keep more money and jobs in the community. Some buildings have good roofs for solar panels. Some people and businesses want to generate local solar power but their roof isn't ideal for solar. Let's swap! We can mobilize the buying power of local property owners, people with trees on their property, local companies, utilities, and government to pay for solar power systems where they make the most energy. That's *Corvallis Community Power*.

**Why Now?** On July 1<sup>st</sup> Pacific Power will introduce a Renewable Energy Payment program paying new solar power generators more than the rate they pay for electricity today. Let's turn Corvallis into a big city-wide solar panel and work together to make more local clean power!

**Structure:** The Community Power Club, a program of Tangerine Solar, will pay property owners for the solar power generated on their roof at the rate they pay for electricity today. Funding to build the solar power systems will come from community members who buy SunSlices™. Each SunSlice is **1 solar panel** installed on a roof the buyer designates from a property accepted into the program. This is an easy way to take your home or office "solar" a little bit at a time while supporting your community. Each SunSlice buyer receives a voting ownership share in the Club, the ability to view their solar power system's electricity production, and rights to their share of any surplus revenue generated from their panel up to the amount of their original purchase.

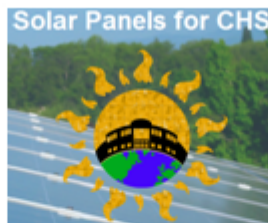

### Split of Power Payments

**What buildings can participate?** The Club will choose locations that meet these requirements:

- Site is served by **Pacific Power** electric service
- A **solar site evaluation** by a qualified installer has been completed showing the building's clear access to the sun
- **Roof material** has at least 15 years of life remaining
- Owner will support the Club's **application for renewable energy payments** from Pacific Power

**Who else is supporting Corvallis Community Power?**

CHS Green Club

**How do I get more information about renting my roof to Corvallis Community Power Club?**

Email Club manager Stanley Florek at [stanley.florek@tangerinesolar.com](mailto:stanley.florek@tangerinesolar.com) or visit [tangerinesolar.com/corvallis](http://tangerinesolar.com/corvallis)

**What else should I know?** *Cooperative Memberships and SunSlices increase the amount of clean solar power in Corvallis through coordinated voluntary action. They should not be viewed as an investment vehicle and are not guaranteed or insured. Cooperative Memberships and SunSlices may not be sold or transferred to 3<sup>rd</sup> parties. All cooperative member/owners must be Oregon residents or organizations with a primary place of business in Oregon.*
